#### **SUGGESTED ANSWERS/HINTS**

1. (i) **False:** Prior Period Items should be separately disclosed in the current statement of profit and loss together with their nature and amount in a manner that their impact on current profit or loss can be perceived
- (ii) **True:** Salary paid in advance relates to the coming accounting period. It has nothing to do with the current period. Hence it is not taken in the Profit and Loss Account as an expense. It is shown as a Current Asset in the Balance Sheet.
- (iii) **False:** If the effect of errors committed cancel out, the errors will be called compensating errors and the trial balance will agree.
- (iv) **False:** The sale value of the by-product is credited to Manufacturing Account so as to reduce to that extent, the cost of manufacture of main product.
- (v) **False:** In Consignment sale, ownership of the goods rests with the consignor till they are sold by the consignee. The consignee does not become the owner of the goods even though goods are in his possession. He acts only as agent of the consignor.
- (vi) **True:** No interest is allowed when the due date of a bill falls after the date of closing the account. However, interest from the date of closing to such due date is written in 'Red Ink' in the appropriate side of account current.
- (vii) **False:** Net income is determined by preparing income and expenditure in case of persons practicing vacation.
- (viii) **False:** As per Section 2 (52) of the Companies Act, 2013, "listed company" means a company which has any of its securities listed on any recognised stock exchange.

**Join Us on Telegram [http://t.me/canotes\\_foundation](http://t.me/canotes_foundation)**

(ix) **False:** According to Partnership Act, in the absence of any agreement to the contrary profits and losses are to be shared equally among partners..

2. (a) Limitations which must be kept in mind while evaluating the Financial Statements are as follows:

- ◆ The factors which may be relevant in assessing the worth of the enterprise don't find place in the accounts as they cannot be measured in terms of money.
- ◆ Balance Sheet shows the position of the business on the day of its preparation and not on the future date while the users of the accounts are interested in knowing the position of the business in the near future and also in long run and not for the past date.
- ◆ Accounting ignores changes in some money factors like inflation etc.
- ◆ There are occasions when accounting principles conflict with each other.
- ◆ Certain accounting estimates depend on the sheer personal judgement of the accountant.
- ◆ Different accounting policies for the treatment of same item adds to the probability of manipulations.

(b) **Going Concern concept:** The financial statements are normally prepared on the assumption that an enterprise is a going concern and will continue its operation for the foreseeable future. Hence, it is assumed that the enterprise has neither the intention nor the need to liquidate or curtail materially the scale of its operations; if such an intention or need exists, it should be disclosed in the financial statements.

**Cost concept:** It means that the value of an asset is to be determined on the basis of historical cost, in other words, acquisition cost. Although there are various measurement bases, accountants traditionally prefer this concept in the interests of objectivity.

			14,70,000

**Working Notes:**

1. Consignor's expenses on 1000 cases amounts to ₹ 1,50,000; it comes to ₹ 150 per case. The cost of cases lost will be computed at ₹ 1,650 per case i.e. 1,500+150.
2. Bharat has incurred ₹ 47,500 on clearing 950 cases, i.e., ₹ 50 per case; while valuing closing inventories with the agent ₹ 45 per case has been added to cases in hand with the agent i.e. 1,500+150+50.
3. The goods in transit (50 cases) have not yet been cleared. Hence the proportionate clearing charges on those goods have not been included in their value i.e. 1,500+150 =1,650.
4. It has been assumed that balance of ₹ 12,43,500 is not yet paid.

Transaction Date	Due Date	Amount	No of days		
8.3.2022	11.7.2022	16,000	22		3,52,000
16.3.2022	19.6.2022	20,000	0		0

		<u>80,000</u>			<u>35,84,000</u>

$$\begin{aligned}
 \text{Average Due Date} &= \text{Base date} + \frac{\text{Total of Product}}{\text{Total of Amount}} \\
 &= 19.6.2022 + \frac{\text{₹ } 35,84,000}{\text{₹ } 80,000} \\
 &= 19.6.2022 + 44.8 \text{ days (or 45 days approximately)} \\
 &= 3.8.2022
 \end{aligned}$$

A wants to save interest of ₹ 628. The yearly interest is ₹ 80,000 × 18%  
= ₹ 14,400.

Assume that days corresponding to interest of ₹ 628 are Y.

$$\text{Then, } 14,400 \times Y/365 = \text{₹ } 628$$

$$\text{or } Y = 628 \times 365/14,400 = 15.9 \text{ days or 16 days (Approx.)}$$

Hence, if A wants to save ₹ 628 by way of interest, she should prepone the payment of amount involved by 16 days from the Average Due Date. Hence, he should make the payment on 18.7.2022 (3.8.2022 – 16 days)

20. (i) Accounting conventions emerge out of accounting practices, commonly known as accounting principles, adopted by various organizations over a period of time. These conventions are derived by usage and practice. The accountancy bodies of the world may change any of the convention to improve the quality of accounting information. Accounting conventions need not have universal application.

**(ii) Distinction between Trade bill and Accommodation bill**

- (a) Trade bills are usually drawn to facilitate trade transmission, that is, these bills are meant to finance actual purchase and sale of goods. On the other hand, an accommodation bill is one which is drawn, accepted or endorsed for the purpose of arranging financial accommodation for one or more interested parties.
- (b) On discount of a trade bill, full amount is retained by the drawer. In an accommodation bill however, the amount may be shared by the drawer and the drawee in an agreed ratio.
- (c) Trade bill is drawn for some consideration while accommodation bill is drawn and accepted without any consideration.
- (d) Trade bill acts as an evidence of indebtedness while accommodation bill acts as a source of finance.
- (e) In order to recover the debt, the drawer can initiate legal action on a trade bill. In accommodation bill, legal remedy for the recovery of amount may not be available for immediate parties.

- (iii) **Machine Hour Rate method of calculating depreciation:** Where it is practicable to keep a record of the actual running hours of each machine, depreciation may be calculated on the basis of hours that the concerned machinery worked. Under machine hour rate method of calculating depreciation, the life of a machine is not estimated in years but in hours. Thus depreciation is calculated after estimating the total number of hours that machine would work during its whole life; however, it may have to be varied from time to time, on a consideration of the changes in the economic and technological conditions which might take place, to ensure that the amount provided for depreciation corresponds to that considered appropriate in the changed circumstances. Proper records are maintained for running hours of the machine and depreciation is computed accordingly. For example, the cost of a machine is ₹10,00,000 and life of the machine is estimated at 50,000 hours. The hourly depreciation will be calculated as follows:

$$\text{Hourly Depreciation} = \frac{\text{Total cost of Machine}}{\text{Estimated life of Machine}}$$

$$\begin{aligned} &= \frac{\text{₹}10,00,000}{50,000 \text{ hours}} \\ &= \text{₹ } 20 \text{ per hour} \end{aligned}$$

If the machine runs for say, 2,000 hours in a particular period, depreciation for the period will be 2,000 hours  $\times$  ₹ 20 = ₹ 40,000.

(iv) Transactions are first entered in a book called 'Journal' to show which account should be debited and which should be credited. Journal creates preliminary records and, is also called subsidiary book. All transactions are first recorded in the journal as and when they occur, the record is chronological, otherwise it would be difficult to maintain the records in an ordinary manner. Journal gives details regarding any transaction. Thus journal tells the amounts to be debited and credited and also the accounts involved.

	Periodic Inventory System	Perpetual Inventory System
1.	This system is based on physical verification.	It is based on book records.
2.	This system provides information about inventory and cost of goods sold at a particular date	It provides continuous information about inventory and cost of sales.
3.	This system determines inventory and takes cost of goods sold as residual figure.	It directly determines cost of goods sold and computes inventory as balancing figure.
4.	Cost of goods sold includes loss of goods as goods not in inventory are assumed to be sold.	Closing inventory includes loss of goods as all unsold goods are assumed to be in Inventory
5.	Under this method, inventory control is not possible.	Inventory control can be exercised under this system.
6.	This system is simple and less expensive.	It is costlier method.
7.	Periodic system requires closure of business for counting of inventory.	Inventory can be determined without affecting the operations of the business.
