

CONSIGNEMENT ACCOUNT

* Distinction between Sale and Consignment

	Sale	Consignment
i)	It is transfer of ownership	It is transfer of possession only.
ii)	Relationship between parties is that of seller and buyer	Relationship between parties is that of principal & agent.
iii)	In case of sales transaction sales invoice is prepared	In case of a consignment a proforma invoice is prepared
iv)	In case of sale the buyer may not have right to return the goods	In Consignee returns the unsold goods to consignor.
v)	Buyer pays value of goods to seller.	Consignee does not pay the value of goods to consignor
vi)	Seller does not pay any commission to the buyer for purchase of goods	Consignor pays commission to the consignee on goods sold by him.
vii)	After sale risk lies with buyer	After goods sent to consignee risk lies with consignor only.

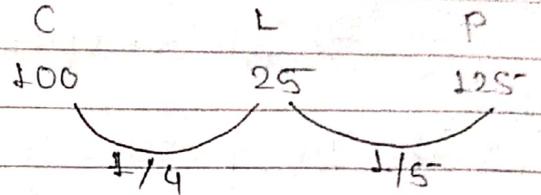

Situation I: loading is expressed as a % of cost

e.g.

i) loading is 25% of cost.
then it is _____ of Invoice Price.

→ let, the cost be 100.
loading = 25% of 100
= 25

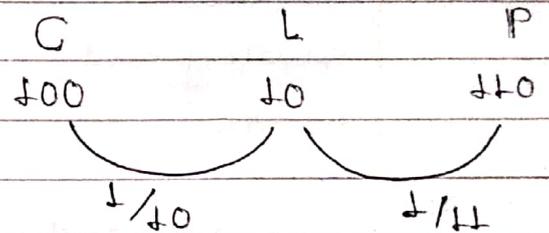

$$\text{I.P.} = 100 + 25 \\ = 125$$

ii) loading is 10% of cost.
then it is _____ of I.P.

→ let, the cost be 100
loading = 10% of 100
= 10

$$\text{I.P.} = 100 + 10 \\ = 110$$

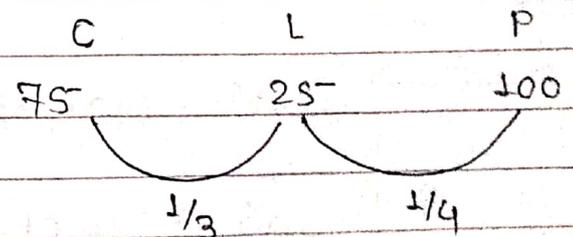

Situation II: loading is expressed as a % of I.P.

e.g.

i) loading is 25% of I.P.
then it is _____ of cost.

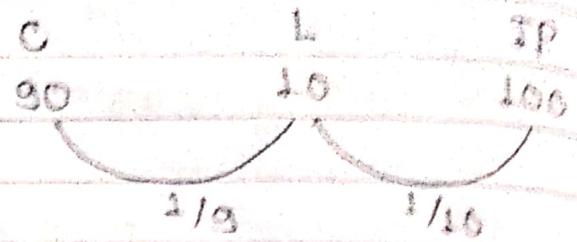

→ let, I.P. be 100
loading = 25% of 100
= 25

$$\text{cost} = \text{I.P.} - \text{loading} \\ = 100 - 25 = \\ = 75$$

ii) loading is 10% of I.P.
Then it is _____ of cost.

→ let, J.P be 100
 loading = 10% OF 100
 = 10
 Cost = 100 - 10
 = 90

Situation III) J.P. is expressed as a % of cost.
 e.g.

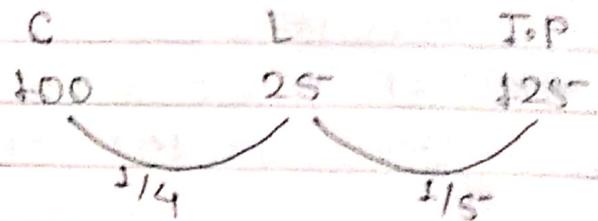

i) J.P. is 125% OF cost

then loading is _____ of cost and _____ of J.P.

→ let, the cost price be 100

J.P. = 125% OF 100
 = 125

loading = 125 - 100
 = 25

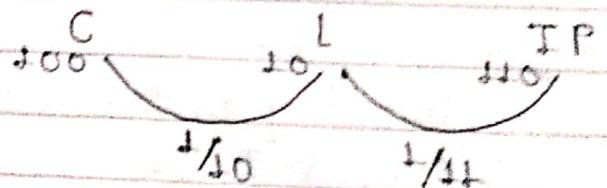

ii) J.P. is 110% OF cost.

then loading is _____ of cost and _____ of J.P.

→ let, cost be 100.

∴ J.P. = 110% OF 100
 = 110

Cost loading = 110 - 100
 = 10

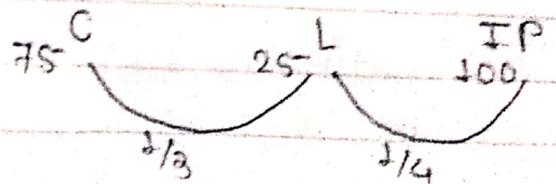

Situation IV) Cost is expressed as a % of J.P.

e.g. i) Cost is 75% OF J.P

then loading is _____ of cost and _____ of J.P.

→ let, J.P. be 100

∴ Cost = 75% OF 100
 = 75

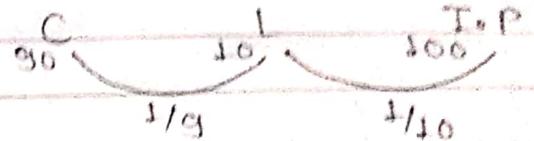

$$\text{loading} = 100 - 75 \\ = 25$$

2) Cost is 90% of J.P.

then loading is _____ of cost and _____ of J.P.

→ let, J.P. be 100

$$\therefore \text{Cost} = 90\% \text{ of } 100 \\ = 90$$

$$\text{loading} = 100 - 90 \\ = 10$$

Examples on loading for self practise (Page NO. 64)

→ Cost = ₹ 300000

loading is 25% i.e. $\frac{1}{4}$ th of J.P. i.e. $\frac{1}{3}$ rd of cost

$$\text{loading} = \frac{1}{3} \times 300000 \\ = 100000$$

$$\therefore \text{J.P.} = \text{Cost} + \text{loading} \\ = 300000 + 100000 \\ = 400000$$

→ J.P. = 600000

loading is 20% i.e. $\frac{1}{5}$ th of cost i.e. $\frac{1}{6}$ th of J.P.

$$\text{loading} = \frac{1}{6} \times 600000 \\ = 100000$$

$$\therefore \text{Cost} = \text{J.P.} - \text{loading} \\ = 600000 - 100000 \\ = 500000.$$

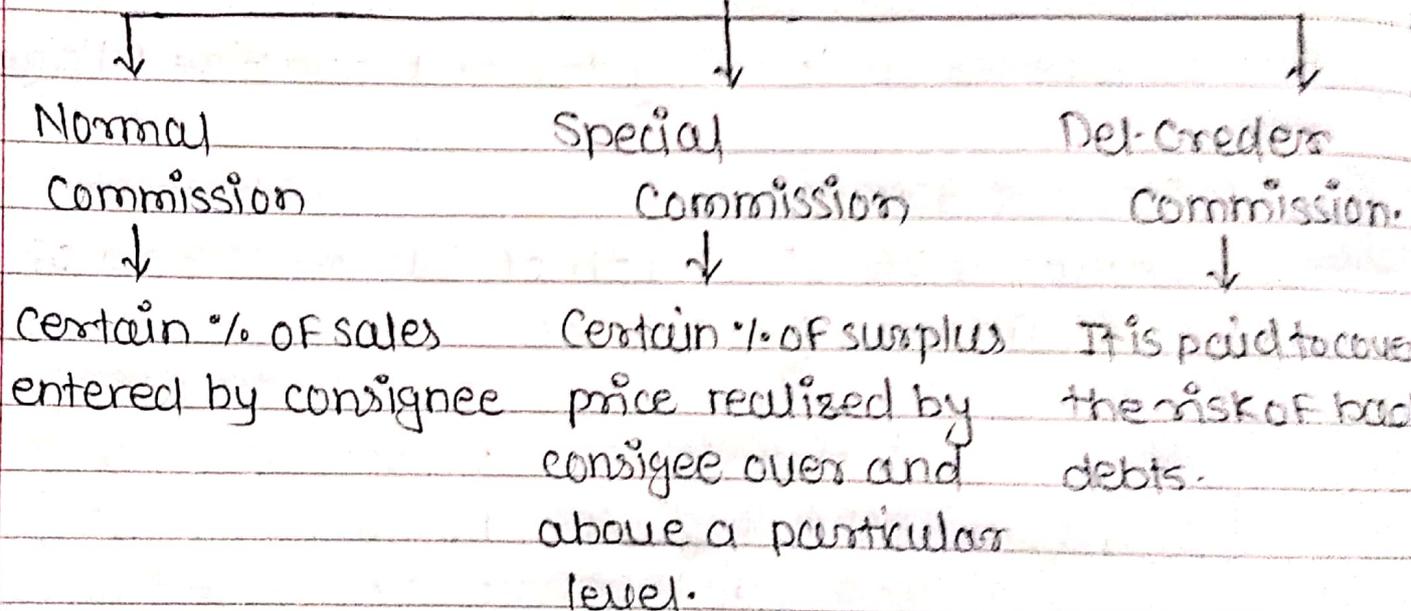

3) Cost = 1,50,000
 loading is $\frac{1}{10}$ of J.P. i.e. $\frac{1}{10}$ th of cost
 loading = $\frac{1}{10} \times 1,50,000$
 = 15,000.

\therefore J.P. = Cost + loading
 = 1,50,000 + 15,000
 = 1,65,000

Commission to Consignee

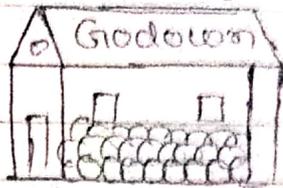

#

Account Sale :

Account sale is a statement rendered by consignee to the consignor providing the details of goods sold by consignee, expenses incurred by consignee, Commission entitled by consignee and net amount due by consignee to the consignor.

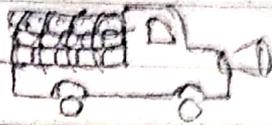

Recurring and Nonrecurring Expenses

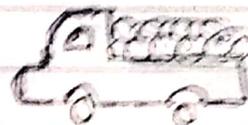

Godown

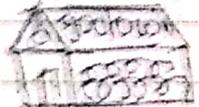

Consignor

customer house

consignee

Distinction between Recurring and non recurring expⁿ

Recurring Expenses

Nonrecurring expⁿ

i)	Regularly / frequently incurred	i) Rarely incurred
ii)	These are paid by consignee only	ii) These are paid by consignee and consignee both.
iii)	These are incurred after the goods reach consignee's godown.	iii) These are incurred before the goods reach consignee's godown.
iv)	These are ignored in valuation of consignment stock	iv) These are added proportionally to value of consig ⁿ stock
v)	Recurring expenses are not considered in valuation of abnormal loss.	v) Non recurring expenses are added proportionally to value of abnormal loss.
vi)	e.g. Godown rent, watchman salary, advertisement etc.	e.g. packing charges, clearing, dock dues, custom duty.

Valuation of consignment stock

Consignment stock refers to goods lying unsold with the consignee at the end of the consignment. It is valued as under

	₹
IP of goods lying unsold with consignee	x ₹xx
add: Proportionate non-recurring expenses of consignor	xxxx
add: Proportionate non-recurring exp ⁿ of consignee	xxxx
Value of consignment stock	<u>xxxx</u>

Note:-

loading included in I.P. of consignment stock is reversed in the form of ~~in the form of~~ stock reserve

Example

i) Thakur sent 1000 boxes costing ₹ 100 each on consignment to Gabbar. Thakur paid the following expenses:

- a. Packing charges : ₹ 1000
- b. Loading expenses : ₹ 1500
- c. Freight : ₹ 2500

Gabbar received the consignment and paid following expenses:

- a. Clearing charges : 800 NR
- b. Godown rent : 1300 R
- c. Unloading expenses : 1200 NR
- d. Advertisement : 700 R
- e. Selling expenses : 1000 R

Gabbar sold 800 boxes find out value of consignment stock.

→ Ascertainment of value of consignment stock:

Cost of goods lying unsold with Gabbar ₹
 $[(1000 \text{ boxes} - 800 \text{ boxes}) \times ₹ 100]$ 20,000

Add: Proportionate non-recurring expⁿ

a. Consignor's Expenses.

$$\frac{₹ 5000}{1000 \text{ boxes}} \times 200 \text{ boxes} = 1000$$

b. Consignee's expenses

$$\frac{₹ 2000}{1000 \text{ boxes}} \times 200 \text{ boxes} = 400 \quad + 1400$$

Value of consignment stock 21,400
