

1. Introduction OF BUSINESS ECONOMICS [1-4]

unit 1 - Introduction

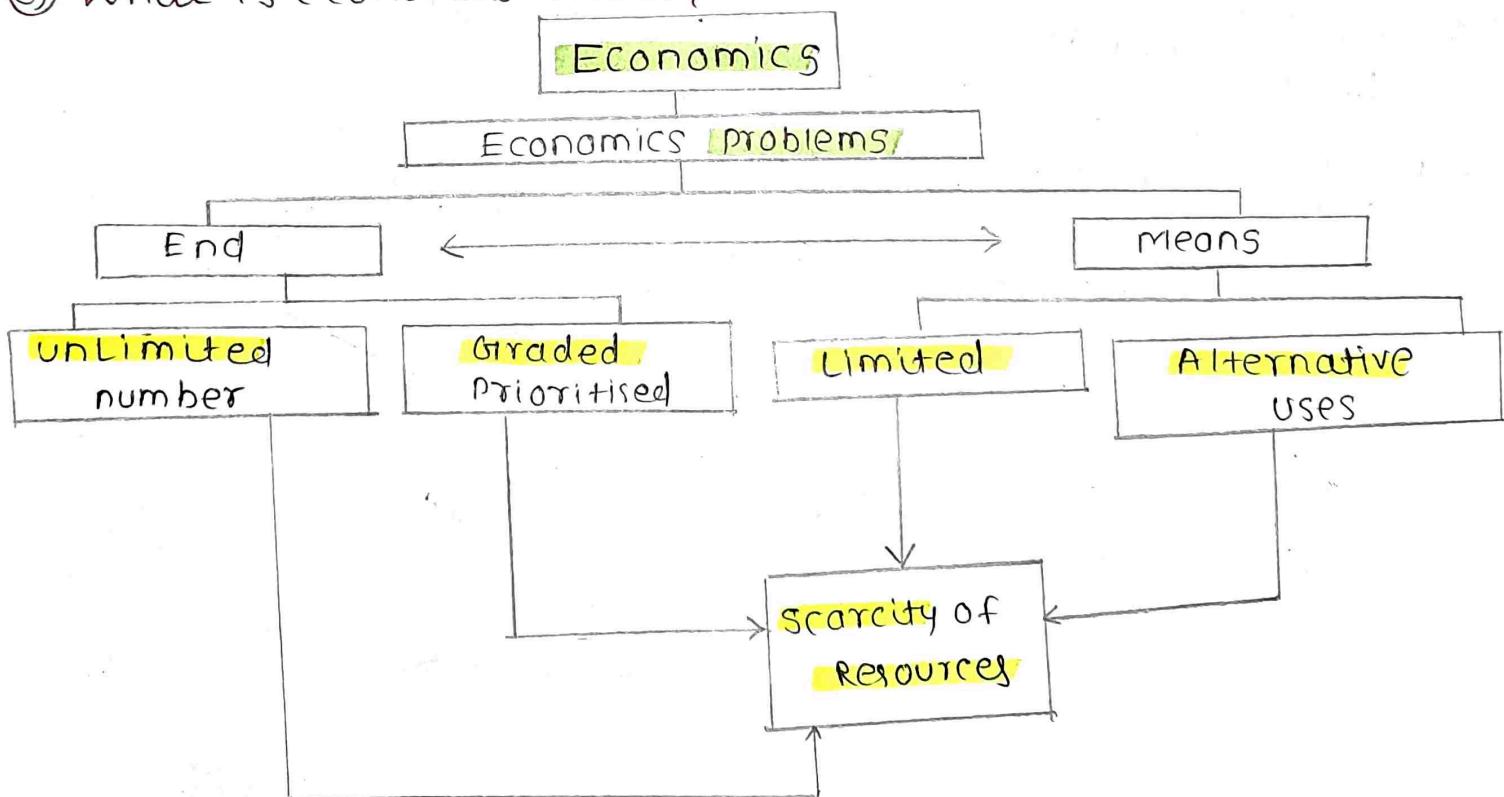

(1) Economics owes its origin to greek word "oikonomia" which means management of household.

(2) There are 2 fundamental fact of economy?

- 1) Human wants are unlimited.
- 2) Means to satisfy these unlimited wants are relatively scarce.

(3) What is economics About?

- (4) What is business all about?
- 1) Business is an economic activity like management, sale, purchase, mining etc.
- 2) Business helps transforming inputs (raw material) into output (goods and services)
- 3) The purpose of any economic activity is to create surplus or profit.
- (5) **Business Economics:** It is application of economic analysis to make decision in business operations.
This concept was given by Joel Dean in 1951.
In simple words
- ① Business economics means use the economic analysis to make decisions involving the best use of an organisation's scarce resources.
 - ② Business economics are also known as Managerial economics.
 - ③ Business economics integrates economy theory with business practices.
 - ④ Economics theory just provide the tools which explain the concept of demand, supply, cost, production, price, marketing, competition etc.
 - ⑤ Business economics apply this tools in the process of decision making of business.
 - ⑥ Business economics fill the gap between economic theory and business practice.
 - ⑦ Business economics is also useful for NGO and non-profit org. as well.

Macro economics VS Micro economics

Micro economics	Macro economics
① It is study of individual economics units of an economy.	It is study of an economy as a whole and its aggregates.
② It deals with individual income, individual prices and individual output etc	It deals with national income general price rural and national output etc.

Its central problem is price determination and allocation of resources.

Its central problems is determination of rural income.

4) Its main roots are demand and supply of particular commodity factors.

Its main roots are aggregate demand and aggregate supply of economy as a whole.

5) It discusses how equilibrium of consumer, a producer or an industry is attained

It is concerned with determination of equilibrium level of income and employment.

* Nature of business economics (SAMP-MINT)

1) Business economics is science:

- Science means systemized body of knowledge which establishes cause and effect relationship.
- Economics provides tools like statistics, econometrics, mathematics etc.
- Business economics integrates the tools into decision making.

2) Business economics is an art:

it involves practical application of rules and principles.

3) Business economics is largely based on micro economics:

4) Business economics incorporates tools of macro economics

(doesn't operate in vacuum.)

5) Business economics use the theory of markets and private enterprise.

6) Business economics is interdisciplinary in approach
