

PAPER – 1: PRINCIPLES AND PRACTICE OF ACCOUNTING

Question No. 1 is compulsory.

Attempt any **four** questions from the remaining **five** questions.

Wherever necessary, suitable assumptions should be made and disclosed by way of note forming part of the answer.

Working Notes should form part of the answer.

Question 1

- (a) State with reasons, whether the following statements are true or false:
- (i) Overhauling expenses for the engine of motor car to get better fuel efficiency is revenue expenditure.
 - (ii) Depreciation is a non-cash expense and does not result in any cash outflow.
 - (iii) Fees received for Life Membership is a revenue receipt as it is of recurring nature.
 - (iv) If Closing Stock appears in the Trial Balance:
The closing inventory is then not entered in Trading Account. It is shown only in the balance sheet.
 - (v) Inventory Turnover Ratio is also known as Stock Turnover Ratio.
 - (vi) If del-creders commission is paid to consignee, the loss of bad debts is to be borne by the consignor. **(6 x 2 = 12 Marks)**
- (b) Discuss the limitations which must be kept in mind while evaluating the Financial Statements. **(4 Marks)**
- (c) A Plant & Machinery costing ₹ 10,00,000 is depreciated on straight line assuming 10 year working life and zero residual value, for four years. At the end of the fourth year, the machinery was revalued upwards by ₹ 40,000. The remaining useful life was reassessed at 8 year. Calculate Depreciation for the fifth year. **(4 Marks)**

Answer

- (a) (i) **False:** Overhauling expenses for the engine of the motor car is incurred to get better fuel efficiency. These expenses will reduce the running cost in future and thus the benefit is in the form of a long-term advantage. So overhauling expenses should be capitalized.
- (ii) **True:** Depreciation is a non-cash expense and unlike other normal expenditure (e.g. wages, rent, etc.) does not result in any cash outflow. Therefore depreciation is a non-cash expense and does not result in any cash outflow.
- (iii) **False:** Life Membership Fee received for life membership is a capital receipt as it is of non-recurring nature. It is directly added to capital fund or general fund.

- (iv) **True:** The closing stock appears in the trial balance only when it is adjusted against purchases by passing the entry (in which Closing Stock A/c is debited and Purchases A/c is credited). In this case, closing stock is not entered in Trading Account and is shown only in Balance sheet.
- (v) **True:** Inventory Turnover Ratio is also known as Stock Turnover Ratio. It establishes the relationship between the cost of goods sold during the year and average inventory held during the year.
- (vi) **False:** To increase the sale and to encourage the consignee to make credit sales, the consignor provides an additional commission generally known as del-credere commission. In case del-credere commission is provided to consignee, bad debts is no more the loss of the consignor and it is borne by the consignee.
- (b) **Limitations which must be kept in mind while evaluating the Financial Statements are as follows:**
- (i) The factors which may be relevant in assessing the worth of the enterprise don't find place in the accounts as they cannot be measured in terms of money
- (ii) Balance sheet shows the position of the business on the day of its preparation and not on the future date while the users of the accounts are interested in knowing the position of the business in the near future and also in the long run and not for the past date.
- (iii) Accounting ignores changes in some money factors like inflation etc.
- (iv) There are occasions when accounting principles conflict with each other.
- (v) Certain accounting estimates depend on the sheer personal judgment of the accountant.
- (vi) Different accounting policies for the treatment of same item adds to the probability of manipulations.
- (c) **Calculation of depreciation for 5th year**
- (a) Depreciation per year charged for four years = ₹ 10,00,000 / 10 = ₹ 1,00,000
- (b) WDV of the machine at the end of fourth year = ₹ 10,00,000 – ₹ 1,00,000 × 4 = ₹ 6,00,000.
- (c) Depreciable amount after revaluation = ₹ 6,00,000 + ₹ 40,000 = ₹ 6,40,000
- (d) Remaining useful life as per previous estimate = 6 years
- (e) Remaining useful life as per revised estimate = 8 years
- (f) Depreciation for the fifth year and onwards = ₹ 6,40,000 / 8 = ₹ 80,000.

1. Fixed Asset is ₹10,00,000
Fixed Assets / Capital = 5/4
Therefore, Capital – ₹10,00,000 x 4/5 = ₹8,00,000
2. Capital is ½ of Total Liabilities
Therefore Liabilities = ₹8,00,000 x 2 = ₹16,00,000
3. Net Profit is 1/5 of Capital
Therefore Net Profit = ₹8,00,000 x 1/5 = ₹1,60,000
4. Net Profit is 20% of Sales
Therefore Sales = ₹1,60,000 x 100/20 = ₹8,00,000
5. Gross Profit Ratio = 25% of Sales
Therefore, Gross Profit = ₹8,00,000 x 25% = ₹2,00,000
6. Stock Turnover Ratio (i.e. Cost of Sales/Average Inventory) is 10
Cost of Sales = Sales – Gross Profit
= ₹8,00,000 – ₹2,00,000
= ₹6,00,000
Therefore Average Inventory = ₹6,00,000 / 10 = ₹60,000
7. Closing Stock is ₹1,00,000
Average Inventory = ₹60,000
Therefore, Opening Stock = (₹60,000 x 2) - ₹1,00,000 = ₹20,000
8. Fixed Assets is ₹10,00,000
Fixed Assets / Total Current Assets = 5/7
Therefore, Total Current Assets is ₹10,00,000 x 7/5 = ₹14,00,000
Closing Stock = ₹1,00,000
Therefore other Current Assets = ₹13,00,000
