

## Mgt. Responsibility $\rightarrow$ G.C. Assessment

- mgt responsibility  $\rightarrow$  Assess entity's ability to continue as a going concern  
*(even if A.R.F. doesn't require it)*

mgt judgment  $\rightarrow$  **Potentiality** **uncertain future outcome of events/conditions.**

Eg legal case pending court  $\xrightarrow{\text{uncertainty}} \text{outcome (future)}$   
(event)

Following are factors considered  $\rightarrow$  Judgment

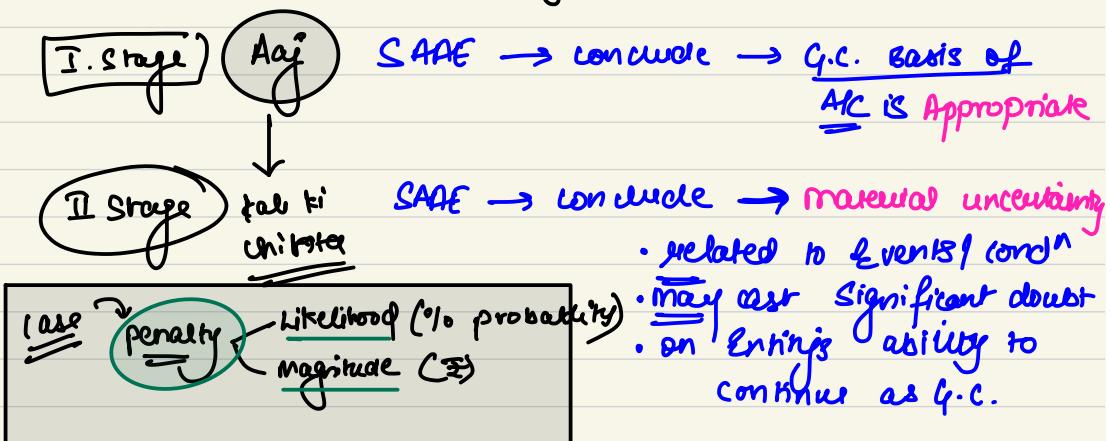

① Co. Entity + degree to which its affected by external factors  
Size Complexity

Eg  
i) Private startup  
100% privately funded.  
ii) Listed Entity  $\rightarrow$  50% on Borrowings Interest rate fluctuating  
SEBI

② Degree of uncertainty about outcome of event/cond"  
Eg Pending Court Case  $\longrightarrow$  Outcome (Probability)

③ Any judgment based on info. available at that point of time.  
 subsequent events "may" result in different outcomes.

### Auditor's Responsibility (2 Stages)

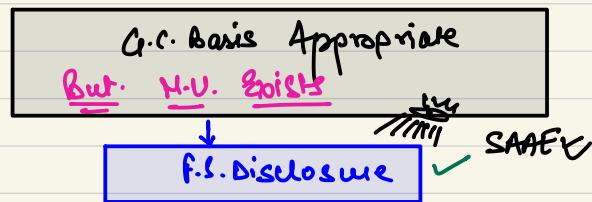

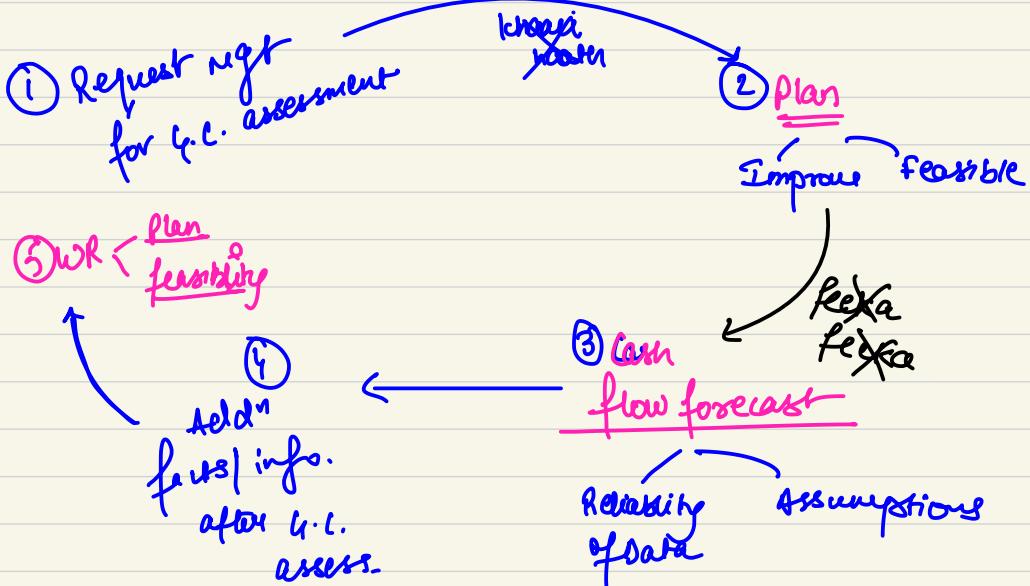

SAAE → G.C. → Difficult for Auditor to detect Material misstatement resulting from future E/C → effect entity's ability to continue as G.C.

- \* Can't predict future E/C
- \* Absence of reference to M.U. can't be viewed as guarantee of G.C.
