Strategic Management Handwritten Class Notes By- Student

CA Rishabh Jain

tec 102
> Meaning of Management:
Management is used in the following 2 ways:-
a) It refers to a key group of people who are incharge of day to day
business affairs in an organization.
6) Management is also used with reference to a set of interrelated functions
and processes which are carried out by above group of people, such as
tec 2.1 functions related to planning, organizing, staffing, directing and controlling.
> Concept of strategy:
a) strategy is a game plan that management may use to achieve any of
the following objectives -
- to improve your market positions
- to conduct operations more effectively
- to compete successfully ie to achieve competitive advantage
b) Strategy is a long range blueprint of entity's desired image, direction and
destination that is answer to following questions -
- What it wants to be?
-What it wants to do?
" Where it wants to go?
2) Strategy is no substitute for sound, alert and responsible management.
Therefore, both strategy formulation and implementation are equally
important to achieve entity's desired objectives.
d) Strategy can never be perfect or flawless. It is in the nature of strategy
that it should be flexible and pragmatic.
that it should be flexible and pragmatic. \$ @ Strategy should be partly proactive and partly reactive: tec 3 - Proactive actions on part of managers includes both previously initiated
approaches which are still working well and newly initiated managerial
decisions that will help in strengthening the overall market position of the
company.
-Reactions to unanticipated developments and tresh market conditions,
sometimes organization's strategy may hit a stone wall due to these

	2.5. \$ \$5. 8 \$7.5 Y

ang a state of the state of the state of the	
	unexpected developments. Therefore, organization may have to initiate
	certain corrective actions or adjustments to the existing strategies:
	the set of
1. A 1. A	Meaning of Strategic Management
	5M is a managerial process of developing a strategic vision along
· · · ·	with goals and objectives, crafting a strategy, implementing and
	evaluating the strategy and initiating corrective adjustments.
	wherever required.
1	
A	Objectives of Strategic Management
	To create competitive advantage so that company can out perform
	competitors in all possible aspects.
	To guide the company successfully through all the changes in the
	business environment.
	a second a first second and a first second
lin 2 1 D	Importance of Strategic Management
uc 4	a) Strategic Management will help an organization become more:
	proactive instead of reactive, therefore organization will be able to
	control their own destiny in a better manner.
b) Strategic Management will help in identifying available opportunities
	in the external environment so that organization can plan for a
	good hiture. Therefore, it acts as a path finder.
)SM can also serve as a corporate defence mechanism against
	mistakes and pitfalls
) SM may help an organization to evolve/develop certain core
	competencies which will help in achieving/creating competitive
e ¹¹ ; ••;	advantage.
	2) SM helps a business to enhance the longevity of the business
	(makes business sustainable)
	. 4

and the second and a second second

3
Limitations of Strategic Management
() Environment is highly complex and turbrilent:
a) it is difficult to understand the complex environment and exactly pinpoint
now it will shape up in future.
b) The environment affects as the organisation has to deal with suppliers,
customers, governments and other external factors.
Strategic management is time consuming:
a) Organisations spend a lot of time in preparing, communicating the
strategies that may impede dually operations and negatively impact the
routine business.
b) Planning and strategizing are important but putting them in action
is where the actual success lies.
3) Strategic management is a costly process:
a) SM adds a lot of expenses to an organization. Expert strategic planners
need to be engaged, efforts are made for analysis of external and internal
environments, devise strategies and properly implement.
b) These can be really costly for organizations with limited resources.
particularly small and medium organizations.
c) SM requires experts and these experts are costly resources.
(4) Difficult to predict competitive resources:
a) In a competitive scenario, where all organizations are trying to move
strategically, it is difficult to clearly estimate the competitive responses
and to gauge strategic planning because these decisions are taken
within closed doors by top level management.

4	Strategic levels in a Business organization
a)	Generally an organization may have following 3 levels of managem
	· Corporate level managers
	• Business level managers
	• Functional level managers
\rightarrow	Corporate level Managers. *
a)	Corporate level managers include board of directors, CEO, other
	senior executives or corporate staff.
6) CLM: occupy the apex of strategic decision making in the organization
Ĉ) Role of a CLM may include the following:
	· defining the vision, mission and goals of the organization
	· deciding what buinesses organization should continue and which
	businesses organization should exit.
	·allocation of resources among different businesses.
	· providing leadership for the organization.
d)	CLM, particularly the CEO, can be viewed as the guardians of
2 	chareholder's wealth. It is their responsibility to ensure that all busines
	strategies are consistent with the core objective of maximizing
. 1	shareholder's wealth.
e)	CEO is the principal general manager
, j	
\rightarrow	Business level Managers
a)	BLM may consist of divisional managers and other staff members.
b)) The main role of BLP1 is to translate general directions and intent
	that comes from corporate level into concrete or specific strategies of
	individual businesses.
	-

1	<u>Ch 4</u>
5	> Boston Consulting Group (BCG) Matrix
	@ BCG matrix is also known as growth-share matrix
: · *	(2) In BCG matrix, vertical access represents market growth rate (market
	attractiveness) and horizontal axis reprents relative market share
	(business strength)
	3) BCG matrix requires organizations to classify their businesses or SBU's in
	the following categories:
an band an change of a second or a second of an of	
	• Stars:
Kellas	- Are products or SBVs that are growing rapidly.
	- Need heavy investment to maintain their position and finance their
	rapid growth potential.
	- They represent best opportunities for expansion.
	· Cash Cows:
	- Are low growth, high market share businesses or products.
nangal por el novembro el person	- They generate cash and have low costs.
	- They are established, successful and need less investment to maintain
a an	their market share.
	- In long run, when the growth rate slows down, stars become cash cows.
	· Buestion Marks:
	- Sometimes called problem children or wildcats; are low market
	share business in high-growth markets.
	- They require a lot of cash to hold their share
	- Need heavy investments with low potential to generate cash
	- If left unattended, they are capable of becoming cash traps
	- Since growth rate is high, increasing it should be relatively easier.
	-It is for business organisations to turn them into stars and then to
	cash cows when the growth rate reduces.

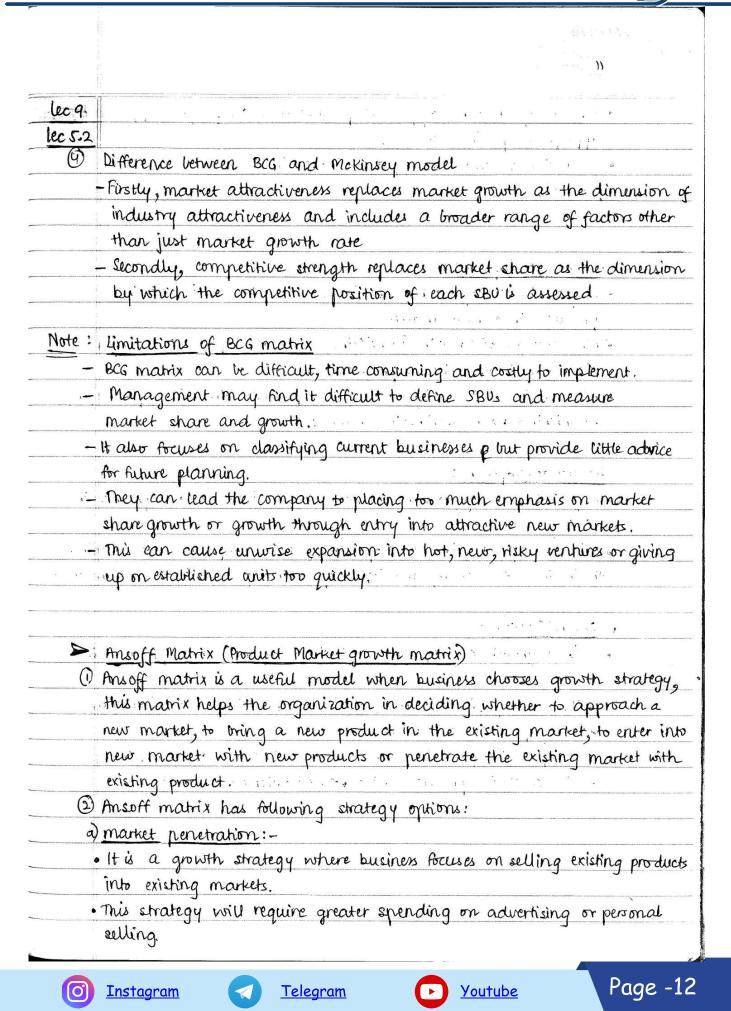

· Dogs: They are low growth; low share businesses and products . - They may generate enough cash to maintain themselves, but do not have much tuture. Sometimes they may need cash to survive - Dogs should be minimised by means of divestment or liquidation lec s.1 lec 8 (1) BCG matrix recommends following strategies after identification of SBUS. a) Build strategy - objective is to increase market share even by foregoing short term earnings in favour of building a strong liture with s · · · · · large market share. b) Hold strategy-objective is to preserve market share c) Harvest strategy - objective is to increase short term cash flows regardless of long term effect. d) <u>Divest strategy-</u> objective is to sell or liquidate the business > General Electric (GE) Model (Mckinsey matrix) () Mckinsey & Company developed a Nine-Cell Matrix for GE organization 2) GE model uses following two factors for strategic decision making: Business strength Market attractiveness · market growth rate • market share • market size · market share growth rate · industry profitability · customer loyalty · competitive intensity · brand image overall pricing trend & · management calibre availability of technology

CA Rishabh Jain 3 Mckinsey recommends the following strategy options depending upon the business strength and market attractiveness. BUSINESS STRENGTH 3 Strong weak Average · . 6 · D. 6 • , ? - ... high Invest expand Select/earn. Invest/expand IVENESS 6 N • R E medium Invest expand Harvest divest select/earn KET P • R · R MA Harvest/divest Low Select earn harvest divest and the second -> If a product falls in the green section, the business is at an advantageory position. To reap the benefits, the strategie decision can be to expand; to invest and grow. at the same a start of the start of the same of the -> If a product is in the amber of or yellow zone, it needs caution and managerial discretion is called for making the strategic choices. l de la la contra a de la contra contra de la -> If a product is in the red zone, it will eventually lead to losses that would make things difficult for organisations. In such cases, the appropriate strategy should be retrenchment, divestment or liquidation. .. * in the second second And the second a and a set of the . 1 and a state · · · · · · · • , , , **, •**.•

0 4.4	
TB Pg 4.4 lec 6.2	Corporate Level Strategies
C C) CLS can be classified into four broader categories:
	a) Stability strategy
	6) Expansion or growth strategy
	e) Retrenchment strategy
٥	Ocombination strategy
2	Stability strategy
,	• One of the most important goals of a business enterprise can be
	achieving stability. This may include the following aspects:
	- safeguarding existing strengths and interests
	- to continue with the chosen business path
	+ to maintain operational efficiency on a sustained basis
	- to optimize returns on resources committed in the business
Korean and the second sec	- to jursue well established and tested objectives
× 31	Reasons for stability strategy:
	+ product has reached maturity stage in PLC
	- when it is not advisable to expand due to changes in business
	environment since it is perceived as threatening.
	- management is comfortable with the status quo since it will
<u>v</u> . ; .	involve less changes and risks.
	-sometimes after rapid expansion, a firm might want to stabilize
	and consolidate, itself:
Note:	Stability strategy is not a 'do-nothing' strategy since organization
فسيب	has to remain updated and have to pace with dynamic
	and votatile kusiness environment to preserve their market share.

al and the adjoint		
· Characteristics of stability strategy:		
- A firm opting for stability strategy stays with the same business, same		
product-market posture and functions, maintaining same level of effort		
+ The endeavour is to enhance functional efficiencies in an incremental way,		
through better deployment and utilization of resources		
- stability strategy does not involve a redefinition of the business of corporation		
- It is a safe strategy that maintains status quo.		
- It does not warrant much of fresh investments.		
- The risk involved in this strategy is less.		
- The organisation can concentrate on its resources and existing businesses/		
products and markets, thus leading to building of core competencies.		
- The firms with modest growth objective choose this strategy.

	Expansion through diversification
1 🛛 -	- Diversification means entry into new products or product lines, new
	services, new markets which may involve different skills, technology and
	knowledge.
-	Generally an organization may pursue diversification if they have
	excessive facilities or capabilities ie unutilised resources.
	Another reason for diversification can be synergistic advantage.
	Diversification can be classified into following broad categories:
	(Refer Note 2)
	Concentric diversification (Refer Note 1.) Conglomerate diversification
	(related diversification) (It includes vertical (unrelated diversification)
	(17 maucies vernicer i i and thorizontal integration)
Note)	Vertically and Horizontally Integrated diversification:
	In case of horizontally integrated diversification, a firm diversifies by
	integrating through acquisition of one or more similar business
	operating at the same stage of product process chain. For eg) a cement
	manufacturer acquires another small cement manufacturer.
	In case of vertically integrated diversification, the firm remains vertically
	within the same process sequence either moving forward or backward in
	the product process chain.
	In case of backward integration, organization may focus on reacting effective.
	input supply by either acquiring an existing raw material provider or
	starting on their own
	In case of forward integration, firm is moving forward in the value chain,
	they may acquire the distribution channel or after sales service provider.
	· · · ·
	•

15-18 Lec 8.1 Note 2 Concentric diversification . In case of CD, new business is linked to existing business in some or the other way. for eg) common technology, marketing channel, distribution channel, manufacturing process In case of CD, new product can be a spin off from extrexisting facilities or capabilities. New product can be connected in a loop like manner at one or more points. Note 3) Conglomerate diversification . In CMD, no linkages related to product, market or technology exist; the new businesses products are disjointed from the existing businesses/ products in every way; it is totally unrelated diversification . In process / technology / function, there is no connection between the new products and the existing ones . CMD has no common thread at all with the firm's present position. for eg) a ament manufacturer diversities into the manufacture of steel and nubber - products. External Growth Strategy: (i) Expansion through mergers and acquistions Students should read basic meaning of mergers and acquisitions and remember that types of merges and acquisitions is same as types of diversification] [Except concentric, write co-generic] Page-19 <u>Youtube</u> Instagram Telegram

19 lec 8.2 (ii) Expansion through strategic alliance. · A strategic alliance is a relationship between 2 or more businesses that enables each one of them to achieve certain strategic objectives which may not be able to achieve on their own: · Strategic alliance can be formed in a global marketplace and it allows strategic partners to maintain their independent status so that they can also continue with their existing businesses. · Disadvantages of strategic alliance -ંકુ શાહ - The major disadvantage is sharing. Strategic alliances require sharing of resources and profits and also sharing of knowledge and skills that otherwise organisations may not like to share. - Shaving knowledge and skills can be problematic if they involve trade secres. - Agreements can be executed to protect trade secrets, but they are only as good as the willingness of parties to abide by the agreements or courts willingness to enforce them. - Strategic alliances may also create a potential competitor when an ally becomes an oppionent in future if it decides to separate out. ·Advantages of strategic alliance-> Organizational advantages): - Strategic alliance will help organizations to learn, necessary skills and obtain certain capabilities from their strategic partners. - Strategic partness may help each other to add credibility and legitimacy -ba new venture. -> (Economic advantages) - Strategic alliance will help in reduction of cost since organizations together may achieve greater economies of scale - Alliance may also help in taking advantage of co-spealization, taking creating additional value to existing products or services.

	17-17-12-12 10-12-20
	(Strategic advantages):
	- Corporate instead of compete
	- It will help in creating competitive advantage due to combined
	resources and skills
	Political advantages:
	- In certain countries, strategic advantage may allow a foreign player
	to enter into the local economy only with the partnership with a
	local player.
•	-sometimes politically influental partners may also help in improving
. 1	the overall position of new venture.
۰. ۵	
lec 9.1	
1	Expansion through innovation: (IMP*)
) Innovation will drive upgradation of existing products, services or
	business processes which may help the organization in increasing
	their market share, revenues, profit margins and may also help in
ng (2 − 6 − 2)	enhancing the overall customer satisfaction.
(ü) Innovation may help a business in their long term growth plan
	since it offers the following: 19412
\rightarrow	Helps to solve complex problems:
1	A business strives to find opportunities in existing problems of society,
مث _ا به	through planned innovation in areas of expertise. This helps solve
	complex problems by developing customer centric sustainable solutions.
	Increases productivity:
	Innovation leads to simplification and automation of existing tasks.
	Productivity is a measure of final output from a task process and
· · · ·	innovation adds to the productivity by automating repetitive tasks and
	simplifying long chain of processes.
\rightarrow	Gives competitive advantage:
•.	· Businesses spend their time in building solutions to achieve CA.
	· faster a business innovates, the farther it goes from its competitor's reach.
	· Innovative products need tess marketing
	· Innovation helps retain existing customers but and helps acquire new ones with ease.

	ala mada.
	्य <u>्य</u> ्य भ
	Retrenchment strategy
(i)) Retrenchment strategy or strategic exits are blowed when an organization
,	is required to substantially reduce the scope of its strategy.
(ü)) RS can be following:
۰. •	if the organization chooses to follow focus on ways and means to
1 -	reverse the process of decline, it can be termed as turnaround strategy.
-	if an organization cuts off the loss making units divisions (SBUs, then
	the strategy adopted can be termed as divestment strategy.
-	When none of the above strategies work, and organizationic wants to
	abandon all the activities, then it can be termed as liquidation strategy.
lec 9.2	
A	Turnaround strategy (75)
•	When organisation wants to reverse the process of decline it may use
	an internal strategy that may be termed as 75.
	Following indicators conditions may point that organization needs a
	TS to survive:
	persistent negative cash flow
<u> </u>	declining market share
	deterioration in physical facilities
\rightarrow	over-staffing, high turn over of employees, low morale
` →	uncompetitive products or services
	mismanagement
•	Important elements of a TS may include the following:
+	Changes in top management
	initial credibility huilding actions
->	neutralising external pressure
→	identifying quick payoff activities
\rightarrow	quick cost reductions
	revenue generation
	asset liquidation for generating cash
	better internal coordination

	e has even. Dos
	22-
70 III. (1777 T	. Action plan for turnaround strategy
Step 1	- Assessment of current problems:
	a) strategists should identify and assess the current problems and get to the
	root causes of company's failure.
	B) After identifying the problems, resources should be focused towards those
i e e t	areas which are essential and which requires immediate correction.
step 2	
	a) Before making any major changes, determine chances of survival.
.	b) Strategists should analyse strengths and weaknesses and develop a
· ' S'	stratigic plan to achieve specific goals.
Step 3	- Implementing an emugency action plan:
	a) If the organisation is in a critical stage, an appropriate action plan
	must be developed to stop the bleeding so that organisation can
mentensteine 6.50%	try to survive.
	5) A possitive operating cashflow must be established as quickly as possible.
tep 4	- Restructuring the business:
	a) If the core business is inrepairably demage irreparably damaged, then
NAME OF COMPANY	the outlook for the entire organisation may be bleak.
	b) Organisation should change their product mix and people mix. By
	changing product mix, company should focus on their core product to
	remain competitive and withdraw from curtain markets which are
	not feasible.
age 5	- Returning to normal:
	a) In the final stage of turnaround process, the organisation should
	begin to show signs of profitability, improved ROI, increased
	market share etc.

Michael Porter's Generic Strategies

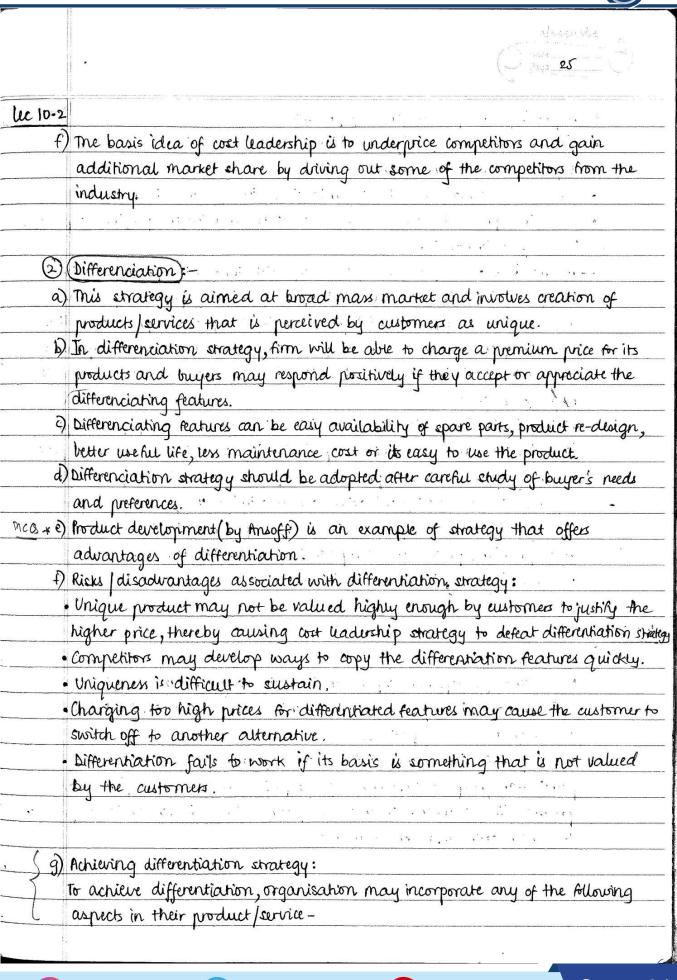

(i) (Cost Leadership):a) It is a low cost competitive strategy that aims the at broad mass market. Because of its lower cost, cost leader will be able to charge a lower price for its products than its competitors. mcs + - b) A primary reason for pursuing forward, backward and horizontal integration is to gain cost leadership benefits. 3) Cost leadership can be effective when following conditions are present: · market is composed of many price-sensitive bruyers. · buyers are not brand conscious · few ways to achieve product differenciation · large numbers of brugers with significant bargaining power. d) Risks associated with cost leadership: (Disadvantages) der 1 - competitors may initate the same strategy. In this case the overall industry's profitability may fall. - buyer's interest may shift towards other differentiating features. -technological break throughs in the industry may make the strategy ineffective. - Cost leadership can succeed only if firm can achieve higher sales volume. e) To achieve cost leadership, company may take following actions: * (. prompt forecasting of demand of a product or service · optimum utilization of resources to get cost advantages · achieving economies of scale leads to lower per unit cost of product /service • standardisation of products for mass production to yield lower cost p.u. · invest in cost saving technologies and try using advance technology for smart · resistance to differentiation till it becomes essential.

- Best, Cost Provider strategy): - i	1
In case of best cost provider strategy, company will try to provide	
more value for money to their customers; this may include:	
a) offering products at a lower price than what is being offered by rivals	
for products with compare able quality and features	
b) charging similar price like rivals but you offer products with higher	
quality and better features.	
the start of the s	
	and the second s
and the second sec	
Competitive Advantage	
a) An organisation is said to have competitive advantage if its profitability	
is higher than the average profitability of all the companies in the	
industry.	
b) Core competencies (unique features) helps an organisation to achieve an	
edge over rivals.	4
2) Sustainability of competitive advantage depends upon the	1
following characteristics of resources and capabilities:	
lection Durability -	
· sustainability of competitive advantage depends upon the rate at	
which tirms resources and capabilities deteriorate.	-
. for eg) if entity is successful due to certain leaders or management	_
expertise then, retirement or departure of such leaders may	-
affect competitive advantage.	_
-> Transferability -	
• The ability of rivals to attack position of competitive advantage.	'
depends upon how easy or difficult it is to gain access of	_
resources and capabilities.	Ĺ
. The easier it is to transfer resources, and capabilities between companies,	-
the less sustainable will be competitive advantage.	and the second s
	-

CA Ri	shabh Jain
_	
	29
\rightarrow	Imitability-
	. If resources and capabilities cannot be purchased, then the competitor will
	have to build them from scratch.
	How quickly competitors can build such capabilities will affect the
	sustainability of competitive advantage.
>	Appropriability_
	· It refers to the ability of firm's owners to appropriate the returns to its
	resource base.
ĩ	Rewards should be directed to those areas from where finds were invested
	rather than creating an advantage for people segments which are not the
	contributor to competitive advantage.
	Core Competency
a)	Core competencies are capabilities that can serve as a source of competitive
	advantage for an organisation.
	Competency can be defined as a combination of skills and techniques rathe
/	than an individual skill or separate technique.
č) As per CK Prahlad and Garry Hamell, Core competency is a combination of
	many capabilities or resources. It can be a combination of 5-15 areas
	because of which, a customer will prefer company's product over the
	competitor's product.
K IMP d)	How to build a core competency:
,	Valuable -
	Valuable capabilities are those that will allow the firm to exploit
	opportunities or to defend themselves from threats.
\rightarrow	Rare -
	Core competencies are very rare capabilities which very few competitors may
	possess. If these capabilities are possessed by many rivals, then it cannot be
	a source of core competency.
5	

	ellas ohr
\rightarrow	Costly to imitate -
	If entities capabilites cannot be developed easily by the competitors or it
	may require significant amount of resources to develop such capabilities
19 (9 (9 ()))	then these capabilities can become a source of competitive advantage.
\rightarrow	Non-substitutable -
	Capabilities that do not have strategic equivalence can be called as
14 15	non substitutable.
	7
	Note] Only when a capability is valuable, rare, costly to imitate and
. 1	non-substitutable, it becomes a core competency. and may
	help in achieving competitive advantage
*	According to CK Prahlad and Gary Harnell, company should ask
	themselves following questions before declaring their capabilities
	as core competencies:
22	Is the capability a competitor differentiation?
	Is the capability valuable for the customer fie a decision maker
	for the customer?
c)	Can this capability be applied to the entire organisation?
1921	X
lec 12.1	
	SWOT Analysis
a)	It is an analysis of entity's strengths, weaknesses, opportunities and
	threats. The primary objective of swor Analysis is to help an
	organisation in developing a complete awareness of all the factors
	that are involved in business decision making it both internal
۵.,	and external forctors.
· • • • • •

> Strategic Leadership	
13 (1) Difference between transformational and	transactional leadership.
A] Transformational Leadership	un en
a) Transformational leadership style use ch	arisma and enthusiasm
to inspire people to exert them for the go	
B) Transformational leadership style may be	
in purbulent environments	3. · · · · · · · · · · · ·
. in industries at the very start or end of th	veir life-cycles
· in poorly performing organisations when t	
company to embrace major changes.	
2) Transformational leaders offer:	
• excitement	
- vision	
·intellectual stimulation & personal satisfaction	n
d) mey inspire involvement in a mission, giving	followers a dream or vision
e) such leadership motivates followers to do mon	e by stretching their abilities &
increasing their self confidence and also pro	mote innovation.
B Transactional leadership	
a) Transactional leadership style focus more on	, designing systems and
controlling the organization's activities and a	are associated with improving win
b) They my to build on the existing culture y	erviance current practices.
c) This style uses the authority of its office to	o exchange rewards like pay &
d) They prefer a more formalized approach to	motivation, setting
clear goals with explicit rewards or penalties	for achievement or non achieven
e) The style is better suited in persuading per	ople to work efficiently and
run operations smoothly.	
F) Transactional leadership style may be appr	spriate
• in static or settled environment	
· in growing or mature industries and	
· in organisations that are performing well.	

	Alternation .
ICAT OS	Strategic managers have five leadership roles for good strategy execution
	Staying on top of what is happening is closely monitoring the progress,
	discovering issues and finding out what obstacles are present in the path of
	good strategy execution.
G	Keeping the organisation responsive to changing conditions. ie being alert for
	new opportunities, identifying new innovative ideas and staying ahead of
	rivals by building valuable apabilities and competencies.
<u></u>	Exercise ethical leadership and invist the company to conduct their affairs
	like a model corporate citizen.
d	Promoting a culture and espirit de corpse that mobilizes and energizes
Lance of the second	organisational members to execute strategy in the best possible manner.
e).	initiate comective actions to improve strategy execution and to improve
	overall performance.
(3)	A manager as a strategic leader has to play many leadership roles
	such as visionary, chief administrator, crisis manager, spokesperson,
	negotiator, motivator, chief entrepreneur and strategist, culture builder etc.
lec 12-2	X
VICE	Strategic Change
T	(Kurt Lewin's model of Change)
	As per the kurt Lewin's model of change, the strategic change process
	has three phases ie unfreezing the situation, changing to new situation
	and re-freezing.
	Unfreezing the situation:-
	Entity's employees may not like sudden or unannounced changes,
	therefore it is suitable to make individuals or entire organisation aware
	about the necessity for change so that they are prepared for a change.
	Unfreezing process involves breaking down old habits and behaviours
	so that organisation can start with a clean slate.
	· Allera - A
	a series of the station of the series of the

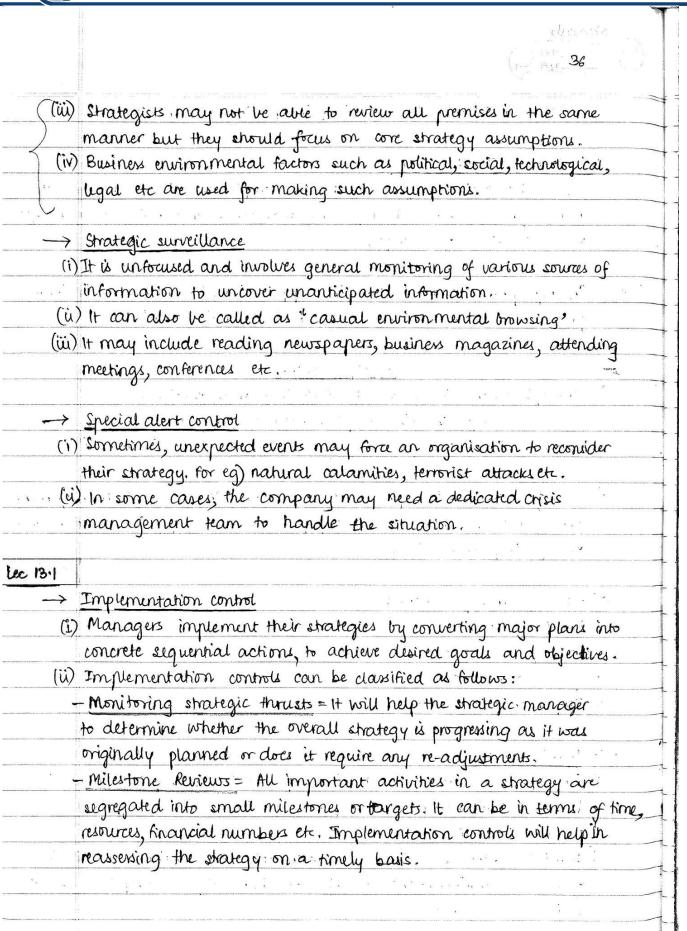

<u>Youtube</u>

35 overcome resistance, this will help in creating a shared vision. (C) Institutionalise the change :-This is the action stage which requires implementation of changed strategy. Change process should be regularly monitored and reviewed to analyse the after effects of change. Note] Change process is not a one time application, but rather a continuous process due to dynamism in the business environment. X interest Strategic Control () Strategic control focuses on the following dual questions: a) whether strategy is being implemented as per planned? (and) b) whether the results produced by strategy are those intended? I strategic control is a process of evaluating the strategic management process because there is a time gap between strategy formulation and strategy implementation. (3) Types of smategic control: a) Premise control b) Strategic surveillance c) special alert control d) Implementation control and the second $S @ \rightarrow$ Premise control (i) Strategies are formed on the basis of certain assumptions about business environment, over a period of time, such assumptions may not remain valid. (ii) Premise control is a tool for systematic and continuous monitoring of business environment to verify whether entity's assumptions are still valid and accurate.

Y.'	or transaction or these controls are for
	business activity. entire organisation,
	dept. or division
	is the second
>	Organisation Structure
\bigcirc	Changes in strategy often requires a change in organisation structure
	because:
a)	Organisation structure dictates how objectives and policies will be establis
	in the organisation.
	Smichure also dictates how resources will be allocated to achieve these
	Objectives.
(\mathbf{C})	Different types of organisation structure can be following:
a	simple structure
) functional structure
ç	Divisional structure
al	Multi-divisional structure
e)	Matrix structure
	Network structure
	SBU structure
h	Hourglass structure

	(1. 38 1.)
- /	Simple structure :
	· aner or manager makes all major decisions and staff members
	merely serve as executors.
	This may result in competitive advantage for emaller firms
	when competing against larger counterparts.
	. This is suitable for those businesses which offer a single line of
3	products in a specific geographic market.
<u>، ، ،</u>	. If small companies want to expand into larger organisations,
	they will outgrow from their simple structure. They may abandon
	simple structure in favour of functional structure.
	ه مرجب هنگ تمر
	functional structure:
	• A functional smuchure groups tasks and activities by a business <
e ²	function, such as production operations, marketing, finance/
	accounting, research and development & management info systems.
	. It is simple and inexpensive and also promotes specialization of
Panne Patrice Sta	labour, encourages efficiency & minimizes the need for an elaborate
	control system. It also allows rapid decision making.
	. The FS enables the company to overcome the growth-related
	constraints of the simple structure, enabling communication & coordination
	· Compared to simple structure, there are potential problems. Differences in
	functional specialization and orientation may impede communication
ta an in the	and co-ordination, thus making it necessary for the CEO to
	integrate functional decision making and co-ordination actions of
	the overall business. across functions
\rightarrow	Hourglass etnicture;
	Information technology and communication has significantly changed
	the way organisation works. One such effect is hourglass structure.
	·Hourglass structure consists of 2 layers with a narrow, middle
	layer.
	Information technology is acting as a link between top level and

di secondore
39
louve lovel encolman
- Contrary to boditional level manager in hourday shuch middle
- Contrary to traditional level managers, in hourglass chricture, middle level managers are general managers which may not require any
specialization.
·Hourglass structure will help in cost reduction, and simplifying decision
making since decision making authority has direct access to the
source of information.
· Continuing at the same level, may bring monotony and result into lack
of interest for lower level managers.
lec 13-2
mile > Divisional structure:
* • Divisional structure can be organised in any of the following ways:
a) by geographical area
b) by product/service
c) by different categories of customers
d) by process
Division on the basis of geographical area - It is appropriate for those
organisations whose business strategies are formulated to fit particular needs
and preferences of target market in different geographic areas. This
structure will allow local participation in decision making.
· Avisional structure by products/services- Sometimes, organisation may
design strategies for specific products or services which may need special
emphasis, therefore separate divisions can be made for different products
and services.
· Division on the basis of customers- few organisations may offer different
kinds of products and services to different category of customers, therefore
company may divide their operations on the basis of customers. For eg) a
dedicated dept. for corporates and a separate dept. for retail customers.
· Divisional structure on the basis of process - If company's final product is
manufactured in different processes and the output of specific process is
marketable and sellable, then company may divide their operations on
the basis of different processes.

<u>Telegram</u>

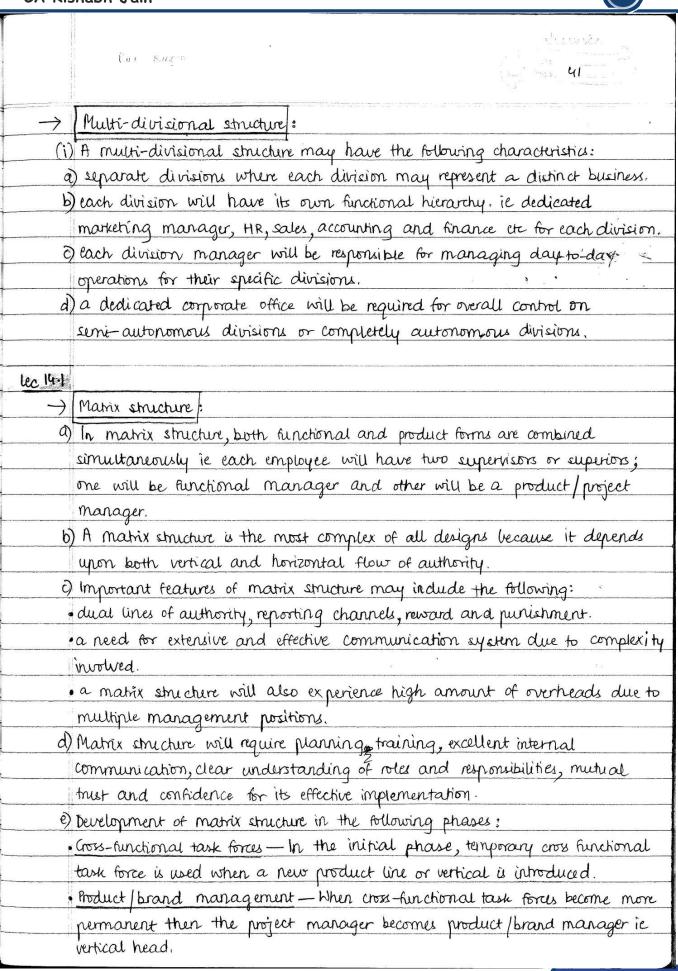

40 · Advantages of divisional structure + accountability is dear - creates career development opportunities for managers • • • • -allows local control of local situations - leads to a competitive climate within an organisation - - employee morale is higher " - allows new businesses and products to be added easily · Disadwantages of divisional smichure - Each division will require a functional specialist, therefore will increase. - There can be some duplication of staff services, facilities or personnel. - Divisional structure requires a headquarter driven control system ie need for comporate staff will also increase. Network smichure: (i) It can also be termed as 'non-smichure' due to elimination of: in-house business functions. Majority activities are outsourced by the company. (ii) In this structure, organisation's operations will comprise series of projects and each project may require specialized skill-sets. (iii) This structure is useful when business works in unstable or uncertain ervironment. (iv) Instead of hiring salaried employees, in this structure, company may contract with people for specific projects. (V) This structure will allow the company to concentrate on its distinctive competencies. ic developing specialisation in a specific field. (vi) The availability of numerous potential partness can be a source of Horuble. Also if a firm overspecializes only on few functions it and the risk of choosing wrong function and may become non-competitive in Acture.

2 Other approach to understand relationship between formulation and implementation

(i) to understand the relationship between strategy formulation and

implementation, we can also use other approach which takes into account efficiency and effectiveness.

 (ii) Efficiency represents relationship between inputs and outputs, therefore it is associated with operations management. (Strategy implementation)
 (iii) Effectiveness is concerned with organisation's attainment of goals

including desired competitive position, therefore strategy formulation will represent effectiveness better.

>	SBU structure: (under organisation structure only)
	It can be a single business or collection of related businesses which requires
	separate planning and strategising.
(ü)	SBU's have their own set of competitors.
(iii)	SBUS will require a dedicated CEO or business head for the purpose of
	decision making.
(ví)	Each SBU will have its own vision, mission, goals and objectives, therefore
~~~	its a separate business from the strategic planning standpoint.
	An organisation with multiple products and services should classify
	their related businesses into specific SBUS so that strategic management
()	process can be implemented effectively.
	SBU structure generally consists of atleast three levels:
	Corporate level at the top
	SBU groups at second level and Division and functional level below each SBU
~ ~	SBUs can also be related to each other is they may have common
	customers, they may be built on similar technologies or they may be
	dependent on common corre competencies.

> Strategic Intent lec 15.1 ① Strategic intent gives an idea of what organisation desires to achieve in huture, in other words, strategic intent represents answer to the question - Why they want to do any specific activity?" (1) To understand the strategic intent, we need to evaluate the following elements: (i) strategic vision (i) mission statement (iii) goals and objectives (iv) value system of the organisation (V) business model (3) Clarity in strategic intent is extremely important for the future . success and growth of company. المتحمد والمراجع المراجع المراجع والمراجع والمراجع والمراجع (1) Elements of strategic intent: A) (VISION)a) A strategic vision is a roadmap of company's future ie it provides specifics about the kind of organisation management is trying to create, their technology and customer focus or the kind of capabilities it plans to develop. b) A clearly articulated strategic vision will communicate management's aspirations to their stakeholders. IMP* ) Essentials of a strategic vision -· While developing a strategic vision, you need to think creatively to prepare a company for the future formulation of a vision will require intelligent entrepreneurship · a well articulated vision creates enthusiasm, for the path management has realed to achieve its vision. It will also engage members of the company.

Page-47

.

	47
d) The best worded vision statement will clearly exp	plain the direction in
which organisation is headed.	
B MISSION-	•
a) A mission statement typically focus on present be	usiness scope ie who we
are and what we do.	· · ·
b) Mission statement describes entity's existing capab	silities, customer focus,
existing technologies and all those activities whi	ich makes up the entire
business.	. <i>1</i> ° .
I Guidelines for formulating a mission statement	•
tec 15.2 is a good mission statement should be precise, de	
motivating	·
is entity's mission statement should clearly emph	nasize on what needs
business is trying to satisfy, what kind of cust	
targeting and what kind of technologies they	
perform their business activities.	
iii) every entity would want to design a mission a	tatement which should
be unique and it should provide a special ider	
d) Why should an organisation have a mission sta	6
· it will serve as a focal point so that everyone	can identify organisation's
purpose and direction.	· · · · · · · · · · · · · · · · · · ·
· mission statement will help in translating entit	y's vision into goals and
objectives so that organisation can plan appropria	
them.	
· mission statement will ensure unanimity of purpos	se for the organisation
. it will also establish a general tone on organisal	tional climate ie
setting the corporate culture.	1
C GOALS AND OBJECTIVES-	
a) Goals and objectives function as a yardstick for	tracking the organisation's
performance and progress.	
b) Organisation should translate their vision and r	mission into appropriate
goals and objectives.	
c) Goals are open-ended attributes that denote fut	rure outcome while

48 objectives are close ended attributes which should be precise and expressed in specific terms. d) Both goals and objectives are interchangeably used. e) Characteristics of goals and objectives: · objectives should be concrete and specific · Objectives should be related to a time frame · objectives should be challenging · objectives should be measurable and controllable · objectives should provide a basis for strategic decision-making · different objectives should correlate with each other · objectives should define organisation's relationship with its environment. . . · · · · +) Examples of long term objectives: - profitability - productivity - competitive position - employee development N 2 - employee relations. - technological leadership -public responsibility g) clearly established goals and objectives will offer many benefits like: · · direction · allow synergy • · aid in evaluation · establish priorities · reduce uncertainty t., - : · minimize conflicts · stimulate exertion 4  $\mathbf{r}^{0} = \mathbf{r}^{0} = \mathbf{r}$ , ¹. •

Strategic Group Mapping	
a) To perform industry analysis, organisation can use a bol	
termed as strategic group mapping.	
b) To use strategic group mapping, strategists need to identify	
all the competitors in an industry and make groups of	
competitors on the basis of business strategies or approaches	•
which are commonly used by them.	
2) Companies may have comparable product line, may sell at	r -
similar price, uses common distribution channel, provides simil	lar .
additional or after sales survices etc.	and the second se
d) strategists need to identify important competitive characteristics	i.
that differenciate businesses in an industry. For eg) pricing (low,	
medium, high); geographical presence (local, national, global)	;
use of distribution channel, types of services offered etc.	-
e) on the basis of above characteristics, plot the firm's on a two	>
variable map where these differentiating characteristics will act	as
a basis. (key surcers factors)	
f) braw circles around each strategic group where circles are	
proportional to the size of group's respective share of total	
industry sales revenue, (represents market share)	
	anton and and a
Les 17.2	
> Meaning of stakeholders -	
a) stakeholders can be defined as any person or group of individual	s
that has an interest in / impact on the enrity's business. They can	be
either internal or external.	
5) Organisation should identify the key stakeholders on the basis g	c
their power to influence the business and their interest in the	
success of business	

3) Stakeholders may include management, employees, shareholders, third party vendors, banking companies etc. Each stakeholder will have different levels of expectations from the business.

- Pria poniati

51

> Mendelow's Matrix

1 This matrix is also known as stakeholder analysis matrix and power interest matrix.

② This matrix suggests that business should analyse their stakeholders ic on their basis of power i.e their ability to influence the business strategy and interest i.e. how interested stakeholders are in the success of business.

3	High	Key satisfied . Key play	01	. ∈.:	· · · ·
	i aj	the set of the set		·	· · · · ·
	wer	low priority i' keep informe			, ¹
	E in	· · · · · ·			. •
		(Intervent in the oar)	high	с. С.	

a) (keep satisfied staxeholders)- High power, less interested people -> Organisation should put in enough work with these people to keep them satisfied with their intended information on a regular basis. b) (Key Players stakeholders) High power, highly interested people -> Organisation's aim should be to fully engage this group of stakeholders, making the greatest efforts to satisfy them, take their advice, build actions and keep them informed with all information regularly. c) (Low priority stakeholders) - low power, less interested people -> organisation should only monitor them' with no actions to satisfy their expectations. Minimal efforts should be spent on this group of stakeholders while keeping an eye to check if their levels of interest/ power change. d) (Keep informed stakeholders) - low power, highly interested people -> organisation should adequately inform this group of people and communicate with them to ensure that no major issues arise. This audience can also help with real time feed backs and areas of improvement for an organisation. Page -52 0 Telegram <u>Youtube</u> <u>Instagram</u>

55 lec 19.1 CH 2: Strategic Analysis for External Environmental Factors Michael Porter's Five force model (Competitive Pressure Analysis): Oto perform competitive pressure analysis, Michael Porter recommended identification and analysis of following five forces :i) competitive pressure associated with the market manoeuvring ie strategies to earn buyers' patronage ie loyalty by rival sellers in the industry. i) competitive pressure associated with threat of new entrants in the industry iii) competitive pressure coming from certain companies of certain other industries to win over the existing customers of your industry ie effect of cubstitute products. iv) pressure from supplier bargaining power. v) pressure from buyer bargaining power. (2) Following steps will help the strategists in drawing conclusions: Step1: identify the specific competitive pressures associated with each of the five forces. step 2: evaluate how strong the pressure is from each five force ie fierce, strong, moderate to normal or weak. step 3: determine whether collective strength of these five forces is conducive to earn attractive profits. (3) Threat of new entrants :-New entrants can reduce an industry's profitability; therefore existing firms will try to raise barriers to entry to discourage new entrants. Common barriers to entry can include the followinga) (Capital requirements) = When a large amount of capital is required to enter an industry, toms lacking funds are effectively barred from the industry, thus enhancing the profitability of existing firms. D(Economies of scale) = EOS refers to the ducline in the per unit cost of production (or other activity) as volume grous.

Page -56

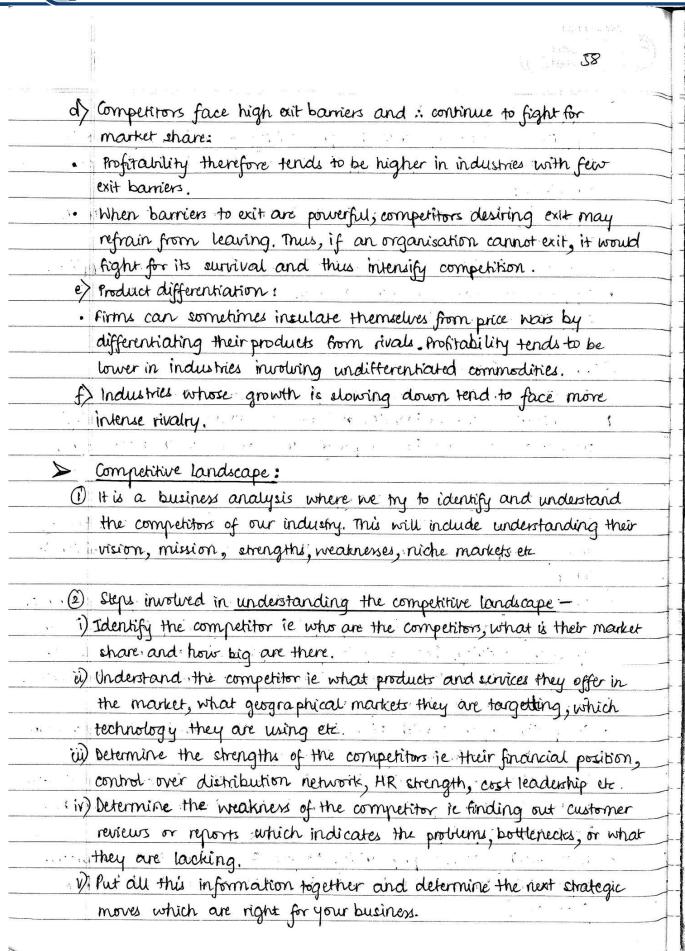

) (Product differentiation) = it refers to the physical or perceptual differences or enhancements that make a product special or unique in the eyes of customers. d) (Switching Costs) = To succeed in an industry, new entrants must be able to persuade existing customers of other companies to switch to its products. Buyers often incur high financial and psychological costs while witching, and this makes them reluctant to change. e) Brand Identity) = BI is important for infrequently purchased products that carry a high unit cost to the buyer: f) (Access to Distribution, Channels) = me unavailability of DC for new entrants poses another threat. Many firms shill continue to rely on their control of physical distribution channels. Often, existing firms have a significant influence over DC and can retard limpede their use by new firms. a in a star a si g) (Possibility of aggressive retaliation) = Sometimes, the mere threat of aggressive retaliation by incumbents can deter entry by other firms into an existing industry. (4) Buyers' Bargaining Power :lec 19.2 Buyers of an industry can sometimes exert considurable pressure on the existing firms to reduce the selling price or to request better services. This leverage is particularly evident when: · buyers have full knowledge of the sources of products and their available substitutes. . buyers are spending a lot of money on the industry's products ie they are big buyer. · when buyers are more concentrated than the firms supplying the product it few buyers and more number of sellers. the main the second 

Ś	Suppliers Bargaining Bower :-
1.1	suppliers can also influence the profitability of an industry; following
	circumstances may help a supplier to exert higher bargaining power over
	a business:
	suppliers' products are crucial for the business and substitutes are not
3.4	available.
•	there may be high switching cost involved to change the supplier.
•	suppliers are more concentrated than the number of buyers it few
	suppliers and more buyers.
	a the charts bett and and and the station of the
Ó	Threat of substitutes:
11	Substitutes are hidden competitors for a product in the industry.
	organisation should identify available substitutes for their industry's
	product and evaluate how impactful they can be in the near future.
· _	
(58) @	Nature of rivalry in the industry:-
<u> </u>	the more intensive the rivality, less attractive is the industry. Rivalry
	among competitors tends to be cut-throat and industry profitability low
	when - 202
۵Ż	An industry has no clear reader. Merefore continuous war for readership.
	a strong leader can discourage price wais by disciplining initiators
	of such activity. Because of its greater financial resources, a leader
	can generally outlast smaller rivals making them avoid such contests.
6)	Competitors in the industry are numerous.
c>	Competitors operate with high fixed costs thus aiming for better return
11	on investment with more fierce tachies:
•.	When rivals operate with high fixed costs, they feel strong motivation
	to to utilize their capacity and there inclined to cut prices when they
	have excess capacity.
\$125	Price cutting causes profitability to fall for all firms in the industry.
	Profitability tends to be lower in industries characterized by high
	fixed costs

<u>57</u>

Õ	Mention 4 stages of PLC ie introduction, growth, maturity & decline.
٤	Advantages of PLC. (Refer Pg 2.8)
lec 21.2	
1	STRATEGIC ANALYSIS :-
,a)	Environmental scanning or strategic analysis is a natural and
<u>}</u>	continuous activity for every business, some businesses may perform
	such analysis on informal basis and some may follow an
	appropriately disigned framework for the same.
, 6)	Strategic analysis forces to think about your rivals and helps in
<del>;</del>	evaluating existing business plans to stay ahead in the game.
	Strategic analysis includes the following considerations:
	evaluating industry and competitive conditions (external)
	evaluating organisation's own capabilities, resources, existing market
N	position etc. (internal)
a	Strategic analysis will help in identifying entity's strengths, weaknesses,
	problems and available opportunities and threats in the external
ر ا	environment.
	Organisations need to identify and evaluate different strategic alternatives
	to achieve desired goals and objectives.
₊J/	After evaluation, organisation will implement the selected strategy &
¶	monitor the overall progress.
NoteT	Issues to consider for strategic analysis -
	Strategies evolve over a period of time ie they are influenced by
	entity's experience.
iù	Strategic analysis requires consideration of both internal and
	external factors, in many industries, balancing these factors and
-	making right strategic decision may be challenging since each
	factor will impact business differently.
(iii	Business environment is highly dynamic and uncertain. For eg) local
